

VISCOFAN **SatisCOLL**

**A novel collagen ingredient
for satiety & wellbeing**

Weight management is a central pillar of well-being and health-conscious consumers choose lean diets that are often not filling.

Based on the established COLLinstant® collagen brand, Viscofan has used its expertise to design SatisCOLL® as a unique collagen formula that contributes to satiety without gastrointestinal side effects and in addition promotes wellbeing as a beneficial protein source.

DUAL MODE OF ACTION CONTRIBUTES TO SATIETY & FACILITATES WEIGHT MANAGEMENT

SatisCOLL® is a natural collagen that swells in the acidic medium of the stomach where it absorbs water and gains volume, thereby causing a sense of fullness.

SatisCOLL® is a slow digesting protein with retarded absorption & metabolism and a long retention time in the digestive system, which leads to a longer lasting satiety.

SATISCOLL® KEY FACTS

- Bovine collagen powder of dermal origin
- Collagen type I with intact natural protein structure
- Large molecular weight with an average particle size of 300 µm
- Recommended daily intake: 2 × 10 g daily

SATISCOLL® BENEFITS

- ✓ Promotes longer lasting satiety, contributes to weight management
- ✓ No special diet required
- ✓ Beneficial source of collagen for general wellbeing
- ✓ Suited for consumers of all ages
- ✓ GMO- & BSE-free
- ✓ Hypoallergenic
- ✓ No risk of contaminations with heavy metals, microplastics, or neurotoxins

Viscofan

UNIQUE!

A SATIETY INGREDIENT WITHOUT GASTROINTESTINAL SIDE EFFECTS

SatisCOLL® is a novel engineered collagen formula that is unique in the market. Its native collagen composition differs from industrially produced collagens, such as hydrolyzed or type II collagen, which have been processed or modified to improve absorption for use in beauty products or supplements.

This wholesome new collagen ingredient does not cause any gastrointestinal side effects like common weight loss substances – no abdominal discomfort, esophageal or gastrointestinal tract obstructions, as observed in a clinical study that evaluated the effects of a daily dose of 2 x 10 g SatisCOLL®.

COLLAGEN'S GLOBAL RISE

Collagen is an important ingredient of protein-enriched diets in fast growing global markets for health foods, nutraceuticals, cosmeceuticals and weight loss supplements.

Life style trends that promote general wellbeing and weight management are key drivers of dietary supplement markets.

STAND OUT –

WITH SATISCOLL® FOODS FOR HEALTHY WEIGHT MANAGEMENT!

- Flexible ingredient for food design, e.g. weight control bars or cookies
- Taste- & odor-free
- Value adding high protein content
- First of its kind: protein ingredient with novel features
- Made in Germany according to latest science & manufacturing standards
