For many, for long.*

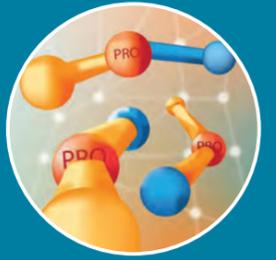

©VISCOFAN | 2025

*COLLinstant ultra active +<sup>®</sup>* is Viscofan's novel ultra low molecular weight collagen that promotes an active lifestyle from within – fast, efficient, and effective.

**Viscofan** *Reshaping food and wellbeing.  
For many, for long.*

## Key benefits

- novel ultra low molecular weight collagen
- fast, efficient, effective
- with bioactive di- & tripeptides
- acts like a collagen condensate
- supports an active lifestyle
- clinically proven benefits on skin appearance
- value-adding high protein content > 92%
- available on industrial scale as powder or tablet

## Glow & fit – ultra fast: A novel dimension in collagen.

With *COLLinstant ultra active +<sup>®</sup>* premium peptides, Viscofan introduces a groundbreaking collagen formula that behaves like a pharmaceutical – with active ingredients, rapid absorption, and clinically proven results – yet is taken as a dietary supplement. This ultra low molecular weight collagen is a fitness and skin vitality solution that is fast-acting, highly efficient, and truly effective for an active lifestyle.

### Ultra low molecular weight with bioactive peptides

*COLLinstant ultra active +<sup>®</sup>* is a novel bovine collagen type I & III hydrolysate with a favorable peptide profile and an ultra low molecular weight below 1000 Da.

It contains a high amount of bioactive glycine- and proline-rich di- and tripeptides (Gly-X-Y). The stable collagen components are quickly absorbed in the digestive tract and transported with high bioavailability to joints, muscles, and the skin.

#### Fast, efficient, effective :

- Rapid, active absorption & optimal bioavailability
- Stable transport to effective organs
- Highly bioactive collagen and elastin synthesis
- Supply of free amino acids as building blocks

The small molecules of this next generation food supplement act like a “condensate” collagen with several magnitudes higher efficacy than standard collagen. This mode of action makes *COLLinstant ultra active +<sup>®</sup>* - the ideal active life style supplement to support a radiant appearance and wellbeing.

### Clinically proven effects on skin vitality

In a six week clinical study, a daily intake of only 2.5 g *COLLinstant ultra active +<sup>®</sup>* was sufficient to elucidate beneficial effects on skin health, including significant reduction of wrinkles, a considerable increase in skin hydration as well as modest improvements in skin elasticity.

The survey among participants attested a high degree of satisfaction with the treatment results and the quick onset among volunteers and physicians alike.<sup>1</sup>

### Adding value to foods, beverages, and supplements

*COLLinstant ultra active +<sup>®</sup>* is the first bovine collagen hydrolysate to combine a beneficial amino acid profile with a science-backed “health from within” formula – traceable, sustainable, and clean-label, meeting modern consumer values. A true innovation in the ingredient market.

In a global supplier network, we offer *COLLinstant ultra active +<sup>®</sup>* on industrial-scale in different particle sizes and bulk densities, as powder or tablet for a broad variety of applications as food/beverage ingredient or as supplement.

### CREATING NOVEL HEALTH FROM WITHIN COLLAGEN FOODS

*COLLinstant ultra active +<sup>®</sup>* is a groundbreaking ultra low molecular weight collagen. Stand out with superior functional nutrition that supports beauty, and an active lifestyle from within!
