Viscofan Reshaping food and wellbeing.
For many, for long.

COLLinstant active® is Viscofan's clinically proven all-rounder premium collagen peptide solution that supports fitness, mobility and wellbeing from within.

A high-performance collagen peptide for all-round wellbeing

Science-based collagen formula

Building on 90 years of collagen expertise, Viscofan has created *COLLinstant active*® as an advanced low molecular weight collagen peptide alternative of superior quality for protein-enriched diets.

COLLinstant active® is the optimal functional food for health-conscious consumers: Its hydrolyzed collagen type I & III peptides contain a unique composition and high amount of essential building blocks, such as the amino acid proline, hydroxyproline and glycine for healthy joints, bones, skin, nails, and connective tissues.

Fitness, mobility, beauty, and healthy aging from within

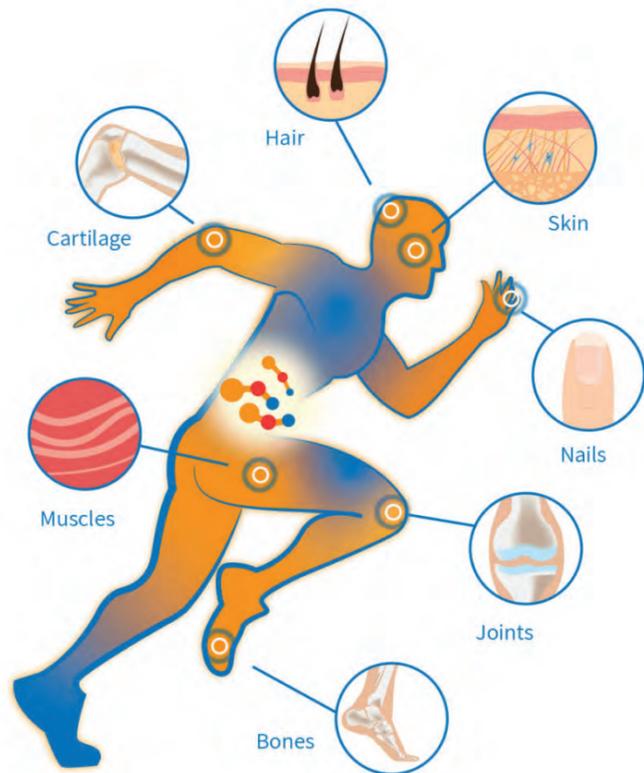

Joint discomfort, reduced mobility, and declining muscle performance are common challenges not only among athletes but also within the aging population. In addition, collagen plays a key role in maintaining skin elasticity and hydration — critical factors in the beauty from within segment.

Collagen is essential for our body. The protein sustains tendons, skin and cartilage, thereby supporting integrity, firmness and elasticity of the musculoskeletal system and the skin.

COLLinstant active® provides bioactive collagen peptides known to stimulate the body's natural collagen synthesis, contributing to the regeneration and maintenance of connective tissues. A daily intake of 10 g supports optimal physiological benefits for optimal effects.

Clinically proven benefits on joint health and mobility

In a clinical study with 120 osteoarthritis patients, 10 g *COLLinstant active*® per day was effective in reducing pain, inflammation, and analgesic use, while at the same time increasing joint function and overall quality of life.

Key benefits

- neutral odor & taste
- instant solubility
- low molecular weight (1 - 2.5 kDa)
- > 96% protein
- allergen- & GMO-free
- controlled & certified
- dust-free easy processing
- clinically proven benefits

The ideal collagen for a broad range of wellbeing from within applications

With *COLLinstant active*®, manufacturers can create science-backed, consumer-trusted products that deliver visible and tangible results — supporting fitness, wellbeing, and healthy aging from within. The taste- and odor-free small peptides are easily digestible and provide an exceptional bioavailability – the ideal supplements for an active lifestyle.

Its excellent solubility, neutral taste, and proven bioavailability make it highly suitable for a broad variety of applications in the functional food sector.

- Functional foods & beverages
- Nutritional supplements
- Sports and active nutrition

Our pledge to premium quality & service

As a safe basis for *COLLinstant active*®, we use bovine raw material from countries without risk of BSE and infection (WHO category 4 tissue) from controlled, GMO-free feed stock. Trusted for decades, our in-house collagen manufacturing from gelatin to ready-to-use collagen delivers consistent high quality – also available for Halal- and Kosher-consumers. In a global supplier network, we offer *COLLinstant active*® on industrial-scale for a broad variety of applications.

COLLinstant active® Premium collagen peptides

COLLinstant active® is an established collagen peptide hydrolysate with an average low molecular weight of 1 - 2.5 kDa for high protein-enriched diets and general wellbeing.

COLLinstant active T® Premium collagen peptides

COLLinstant active T® is a collagen peptide formula for special applications and formats, such as tablets with tailored particle size and humidity. It has an average low molecular weight of 1 - 2.5 kDa.
